Hey Rick,  
Sue at BBNA thought you were going to get the document attached below when you were in Ekwok. The document is draft so I imagine a final version will be sent to EPA when it is available. Once Michael Szerlog gets all of the folders created in the quickplace site we should put this in there.

Thanks - Tami

Tami, a FYI forward but do check out the second document. I believe (not 100 percent sure) the draft document provided to Rich P at the meeting today in Ekwok. Sue

Wes,

I wanted to provide you a copy of the final draft. I'm copying Mahri as I'd like to set up a session at next year's environmental conference (if possible) to present the guide and also the Cover Your Assets (CYA) Manual as BBNA's tailored approach to provide technical assistance with program planning and also administrative and financial management. I'm also copying Sally Thomas as I thought she'd appreciate a copy. Plus the case studies (appendix) would make a good insertion for future "success story" documents, etc.

One of these days, I'll do an article for the EPA R10 Tribal Newsletter if it ever slows down! BTW: we had an excellent NM Watershed Council meeting in Ekwok last week (see attached agenda). Rather amazing to see all the collaborative work that has been done to implement strategies in the plan (e.g. Instream flow reservations). The council is taking a proactive approach to address large scale mineral development and adopted the attached Framework for Responsible Mining in the Nushagak River Watershed: A Preliminary Statement of the NM Watershed Council". This action tied to one of the strategies in the Nushagak River Watershed Traditional Use Area Conservation Plan, adopted by the NMWC in 2007.

Later,

sue
